EDUCATION

MGM University

Bachelor of Technology in Computer Science — CGPA: 7.8/10

Chh. Sambhajinagar, MH

Expected 2026

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL, Java

Backend: Node.js, Express.js, FastAPI, .NET Core, Next.js API Routes / Server Actions

Frontend: React, Next.js (App Router), React Native, Tailwind CSS, Radix UI, Framer Motion

Databases & ORM: PostgreSQL, MongoDB, MySQL, Prisma ORM

Tools & Libraries: Git, GitHub, NextAuth.js, TanStack Query, Zod, React Hook Form, Stripe

EXPERIENCE

Full-Stack Developer Intern

Nov 2025 – Dec 2025

TeknoTantra Systems Pvt. Ltd. | Multi-Tenant Real Estate Platform

- Designed **tenant-aware REST APIs** in **.NET Core** for listings, bookings, and user management with strict **row-level data isolation**.
- Implemented **JWT authentication** and **RBAC** across four roles: Super Admin, Tenant Admin, Host, and Guest.
- Designed normalized **PostgreSQL schemas** with foreign keys and composite indexes to support high-throughput booking and search queries.
- Built a **React** frontend consuming paginated and filtered APIs with **optimistic UI updates** to minimize perceived latency.

Full-Stack Developer Intern

Jan 2025 – Jun 2025

Discoverr Labs.AI | Training & Placement Portal (MGMU)

- Architected a **multi-tenant** web application with **Next.js**, **Prisma ORM**, and **MongoDB** with tenant-scoped API routing and access control.
- Built **REST APIs** for student onboarding, job postings, applications, and eligibility workflows.
- Implemented a **5-level RBAC** model with secure session handling and route-level authorization.
- Reduced API response latency through **Prisma query optimization** via selective field fetching, schema indexing, and cursor-based pagination.

Freelance Full-Stack Developer

Jun 2024 – Dec 2024

Inventory Management System | enrichfurniture.com

- Built **REST APIs** for inventory tracking, warehouse transfers, and audit logging using **Next.js** Route Handlers and **Prisma ORM**.
- Modeled **transactional PostgreSQL schemas** supporting stock reconciliation, FIFO reservations, and historical audit trails.
- Enforced **schema-level validation** with **Zod** at API boundaries and improved UI performance with **React Query** caching and **SSR**.

PROJECTS

Obsidian — AI Fitness Platform | *Next.js, TypeScript, Google Gemini AI, Zod, Tailwind CSS, Radix UI* Live | GitHub

- Architected a full-stack AI fitness platform generating personalized multi-week workout and nutrition plans via **Google Gemini**, using structured prompt context built from user biometrics, dietary restrictions, and health conditions.
- Built a **Next.js Route Handler** pipeline with **Zod** schemas to validate and parse complex AI outputs — TDEE calculations, macronutrient profiles, and exercise protocols — into a type-safe client-ready format.
- Delivered a responsive, premium UI with dynamic data visualizations and micro-animations using **Tailwind CSS** and **Radix UI** primitives.

SpecForge — PC Hardware ERP & E-Commerce | *Next.js 16, React 19, PostgreSQL, Prisma ORM, TanStack Query* Live | GitHub

- Engineered a **PC Builder Compatibility Engine** validating CPU socket, RAM clearance, and PSU requirements across **40+ relational entities** via complex **Prisma ORM** joins and constraint logic.
- Built a **Serialized Inventory Management System** with serial-level tracking, **FIFO reservation logic**, and **ACID-compliant stock ledgering** via Prisma transactions to guarantee data integrity under concurrent fulfillment.
- Architected **type-safe Server Actions** with **Zod** validation and **NextAuth.js v5** for auth, with **TanStack Query** for server-state management; delivered a glassmorphism UI using **Framer Motion** and Tailwind CSS 4.
